

The Ecobox™ System oil change has arrived

The Ecobox™ System Store Benefits

- Fast bay times – no handling individual quart bottles
- Inventory control – (Built in visual ports with graduated inventory markings makes gauging oil level easier)
- Oil in-stock in the bays (less restocking compared to bottles)
- Lower cost per quart
- Less waste (saves trips to the trash can and help save millions of plastic bottles from going into landfills)

The Ecobox™ System Customer Benefits

- Oil change experience can be enhanced (improved service times)
- Doing their part (customer feels good about helping the planet without paying extra)
- Receive high quality oil (customer receive the same high quality of found in bottles)

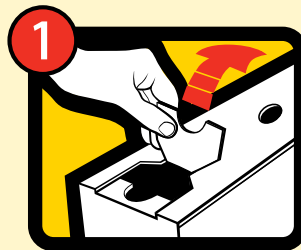

The Ecobox™ System is:

- 1 Ecobox™ System rack
 - Made from recycled steel
 - Load capacity 1,000 lbs.
 - Easy install and assembly
- 1 Ecobox™ box shelf (holds 6 Ecobox™ System cartons)
 - Made from recycled steel
 - Load capacity 500 lbs.
 - Easy install and assembly
- 1 Ecobox™ System pitcher shelf (holds 6 Ecobox™ System pitchers)
 - Made from recycled steel
 - Load capacity 200 lbs.
 - Easy install and assembly
- 6 Ecobox™ System pitchers which are:
 - Easy to grip
 - Easy to pour
 - Easy to store
 - Clearly marked for accurate fills

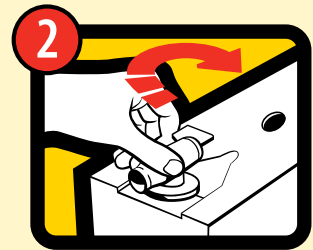

System can be easily upgraded to a two shelf system that holds 12 boxes and pitchers.

Using the Ecobox™ System plastic liner results in 89% less plastic land fill waste than 24-quart plastic bottles. The Ecobox™ System carton is fully recyclable.

How to use the Ecobox™ System

Lift up flap

Pull up spout and slide into position

Place on Ecobox™ rack

Open spout to pour oil into pitcher

When box is empty, pull tap and bag from box. Properly dispose of box. Always recycle where possible!
